

The Hub Newsletter Summer 2

Butterflies- After watching the caterpillars grow and transform into butterflies, the children were excited to release them into outside. They carefully watched as the butterflies spread their wings and flew away.

Under the Sea- The children enjoyed exploring the topic of Under the Sea through a variety of engaging activities. They identified and named different sea creatures, shared stories with an under-the-sea theme, and took part in imaginative small world and messy play using the tuff tray. The children developed their communication and language skills, expanded their vocabulary, and used their imagination as they explored, discussed, and role-played different sea life and ocean habitats.

Summer- The children enjoyed exploring the topic of summer through a range of fun and engaging activities. We discussed sunny weather, learned about the importance of staying safe in the sun by wearing hats and using sunscreen, and ways to keep cool. The children also enjoyed singing summer-themed songs, joining in with actions and familiar words, while developing their communication, understanding of the world, and personal, social, and emotional skills.

Health Week- The children enjoyed taking part in Health Week, learning about different ways to keep their bodies healthy. They explored healthy foods, discussed the importance of personal hygiene, and practised good handwashing and toothbrushing routines.

The children also benefited from visitors to the setting who promoted physical health through engaging activities. Families were invited to attend a healthy living workshop, strengthening the partnership between home and school while supporting the children's understanding of healthy lifestyles.

Announcements!

School breaks up on **Wednesday 22nd July** and reopens for children on **Monday 7th September**.
